B TECH COMPUTER SCIENCE AND ENGINEERING | CYBERSECURITY ENTHUSIAST

Programming | Python | Network Security | Vulnerability Assessment | Security Monitoring | Burp Suite | Wireshark | Nmap | OSINT | TCP/IP

PROFESSIONAL SUMMARY

Cybersecurity-focused Computer Science undergraduate with hands-on penetration testing experience and practical exposure to network security and threat analysis through platforms such as TryHackMe. Skilled in Python scripting, vulnerability assessment, and tools including Burp Suite, Cowrie, Hydra, Wireshark, and Nmap. Strong foundation in security monitoring and incident detection principles with a passion for identifying and mitigating cyber threats.

STRATEGIC SKILLS

- Hands-on penetration testing and cybersecurity lab experience through TryHackMe.
- Strong understanding of network security fundamentals and threat analysis.
- Experience with Python scripting and automation for security-related tasks.
- Familiarity with SOC operations, intrusion detection, and incident monitoring.
- Knowledge of firewall configuration and network segmentation concepts.

PROJECTS

Practical Cybersecurity Experience | TryHackMe

- Completed 289+ rooms covering networking, penetration testing, web security, and Linux/Windows exploitation.
- Earned 35 badges including Platinum League and long-term streak achievements.
- Gained experience in SQL injection, phishing analysis, OSINT, and ethical hacking techniques.
- Participated in Advent of Cyber 2023, 2024, 2025 and Hack2Win competitions.

Cisco Packet Tracer: ASA Firewall with 3-Zone Segmentation

- Implemented a Cisco ASA firewall with Inside, DMZ, and Outside zones.
- Configured ACLs, NAT, and firewall policies.
- Performed VLAN-based network segmentation.
- Validated secure communication between network zones.

MVTool v2.6 – Python Port Scanner

- Developed a multithreaded TCP port scanner.
- Implemented service fingerprinting and banner grabbing.
- Designed a Tkinter-based GUI.
- Optimized scanning using ThreadPoolExecutor.

SSH Honeypot Deployment & Threat Analysis (Cowrie | Docker | Hydra)

- Deployed a Cowrie SSH honeypot for attacker activity monitoring.
- Simulated brute-force attacks using Hydra.
- Analyzed logs and identified indicators of compromise.
- Investigated attacker behaviors and command execution patterns.

Password Breach Checker

- Built a CLI-based password breach checker using Python.
- Integrated Have I Been Pwned API using k-anonymity.
- Added offline SHA-1 hash verification capability.
- Ensured secure password handling and privacy.

AREAS OF EXPERTISE

Security Monitoring | Vulnerability Assessment | OSINT | Network Security | Threat Analysis | Firewall Configuration | Incident Detection | TCP/IP | DNS | HTTP/HTTPS

TECHNICAL PROFICIENCIES

Programming Python | Bash (Basic)

Security Tools Burp Suite | Wireshark | Nmap | Cowrie | Hydra | Cisco Packet Tracer

Networking TCP/IP | DNS | HTTP/HTTPS | Firewall Configuration

CERTIFICATIONS

- Fortinet Certified Fundamentals in Cybersecurity
- Microsoft Applied Skills: Get Started with Cloud Security and Monitoring Tasks
- Microsoft Applied Skills: Build a Generative AI Chat App

- IBM SkillsBuild Cybersecurity Certificate
- Junior Cybersecurity Analyst Career Path – Cisco
- AI Upskilling Certificate: Technical Foundations – Qualcomm Technologies

EDUCATION

AHALIA SCHOOL OF ENGINEERING AND TECHNOLOGY Bachelor of Technology in Computer Science and Engineering GPA: 8.3	2023 – 2027
PALGHAT LIONS SCHOOL Higher Secondary Education – Computer Science GPA: 9.0	2021 – 2023
