B TECH COMPUTER SCIENCE AND ENGINEERING STUDENT | CYBERSECURITY ENTHUSIAST

Cybersecurity-focused Computer Science undergraduate with hands-on penetration testing experience and practical exposure to network security and threat analysis through platforms such as TryHackMe. Skilled in Python scripting for security automation, vulnerability assessment, and tools including Burp Suite, Cowrie, and Hydra. Strong foundation in incident detection and security monitoring principles, with a passion for identifying and mitigating real-world cyber threats.

EDUCATION

AHALIA SCHOOL OF ENGINEERING AND TECHNOLOGY, PALAKKAD

BACHELOR OF TECHNOLOGY - BTECH in COMPUTER SCIENCE AND ENGINEERING • GPA: 8.3

2023 - 2027

PALGHAT LIONS SCHOOL

HIGHER SECONDARY EDUCATION in COMPUTER SCIENCE • PALAKKAD KERALA INDIA •
GPA: 9

2021 -
2023

CERTIFICATIONS

FORTINET CERTIFIED FUNDAMENTALS IN CYBERSECURITY - FORTINET

MICROSOFT APPLIED SKILLS: GET STARTED WITH CLOUD SECURITY AND MONITORING TASKS - MICROSOFT

SKILLSBUILD CYBERSECURITY CERTIFICATE - IBM

JUNIOR CYBERSECURITY ANALYST CAREER PATH - CISCO

AI UPSKILLING CERTIFICATE: TECHNICAL FOUNDATIONS - QUALCOMM

PROJECTS

Practical Cybersecurity Experience

TryHackMe

Self-directed cybersecurity training and hands-on lab challenges *on TryHackMe platform*

- Completed **298rooms** across topics including **networking, web security, penetration testing, and Linux/Windows exploitation**

- Earned **35 badges**, including high-level achievements like **Platinum League, Gold/Silver/Bronze League placements, and streak awards** (up to 250+ days)

- Hands-on experience with **ethical hacking, SQL injection, OSINT, phishing analysis, and security awareness modules**

- Applied **Python scripting, network analysis, and system exploitation** techniques through structured lab environments

- Developed strong problem-solving and cybersecurity fundamentals while participating in themed events like **Advent of Cyber 2023/2024/2025** and **Hack2Win competitions**

Cisco Packet Tracer: ASA Firewall with 3-Zone Segmentation (Inside / DMZ / Outside)

Network security simulation using Cisco Packet Tracer

- Implemented a **Cisco ASA Firewall** with three security zones: Inside, DMZ, and Outside
- Configured **NAT, ACLs, and firewall policies** to enable secure communication between zones
- Segmented network traffic using **VLANs and switches**
- Tested **end-to-end connectivity** (ping and web browser) to validate network functionality
- Demonstrated **firewall policy enforcement** and secure traffic management between networks

MVTool v2.6 – Python Port Scanner

- Developed a **multi-threaded TCP port scanner** using **Python** and **sockets**
- Implemented **banner grabbing** and **service/version fingerprinting**
- Designed **GUI** using **Tkinter** with **real-time scanning, progress tracking, and stop control**
- Optimized scanning performance using **ThreadPoolExecutor**

SSH Honeypot Deployment & Threat Analysis (Cowrie | Docker | Hydra)

- Implemented a **Cowrie-based SSH honeypot** to capture and analyze **unauthorized access attempts** in a controlled environment
- Simulated **brute-force** and **credential stuffing attacks** using **Hydra** to generate realistic attack traffic
- Analyzed **structured (JSON)** and **unstructured logs** to identify **Indicators of Compromise (IoCs)**
- Investigated **attacker behavior** including **login attempts, password patterns, and command execution**
- Strengthened skills in **SOC operations, threat monitoring, intrusion detection, and cybersecurity analysis**

Password Breach Checker

Python-based security tool for detecting compromised passwords

- Developed a **CLI-based password breach checker** using **Python** to identify compromised credentials
- Integrated **Have I Been Pwned (HIBP) API** using **k-anonymity** to ensure secure online password checks
- Implemented **offline breach detection** using custom **SHA-1 hash datasets** for secure, offline analysis without internet dependency
- Ensured **secure password handling** with hidden CLI input and no storage/logging of sensitive data
- Built a **lightweight and efficient tool** with minimal dependencies, focusing on privacy and usability

SKILLS

- **Programming:** Python, Bash (basic)
- **Cybersecurity:** OSINT, Vulnerability Assessment, Phishing Analysis, Security Monitoring, Network Security
- **Tools:** Burp Suite, Nmap, Wireshark, Cowrie, Hydra, Cisco Packet Tracer
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, Firewall Configuration
